Fountech systems with truly unlimited color, texture, design and patterns option, provide the ideal choice for homes, apartments, retail store, restaurants, shopping malls, school, college, office and other high traffic interior, exterior application where exclusive, durable and esthetics flooring is required.

CAR PARK/GARAGE FLOORING

Generally concrete is damaged due to carriage or movement of vehicle in the parking area or garage. Due to the extra pressure or wheel load of the car, spill of oil, mobil, grease etc. are the causes of permanently damaged of concrete. Moreover, it cannot be easily cleaned.

Fountech providing Car Park flooring solution in Bangladesh. Which Keep your floor or basement safe by keeping your concrete and tolerating extra load. It can be cleaned easily.

SPORTS FLOORING

Different sports (Basketball, running, dance, fitness, tennis, badminton etc.) need different sports floors. Fountech deals a full range of sports flooring systems. Our flooring systems are appropriate for all circumstances and could be installed both outdoors plus indoors.

Our polyurethane sports floorings are well-known for their guaranteed top quality for each types of sports in all possible climates across the world.

CONCRETE WATERPROOFING

One of the most common concrete difficulties in Bangladesh is water leakage at Building construction structures. That this leaking water not only damages the structures but also hampers the artistic appearance. Thus, it causes progress of fungus and algae, dampness and also the peeling out paint or coating. Concrete is porous and lots of micro crack, that absorbs water naturally. That absorbs water contaminants, salt and other chemicals cause deterioration. In case you want to save your concrete and also make sure it has a durable life, waterproofing is essential.

Concrete Waterproofing is a system which prevents water from your concrete structure penetrating absorb water. Waterproofing method is very imperative as it benefits to preserve your house dry, healthy and safe. It makes sure to decrease moisture absorbs into the concrete and thereby protects concrete from damage produced due to humidity or water exposure. Water is compulsory for concrete curing. Similar, Water is extremely dangerous for concrete after curing. So that, concrete Water proofing is a very significant subject for living fine and healthy construction.

Fountech providing different types of waterproofing like [Acrylic Waterproofing](#), [Cementitious Waterproofing](#), [Polyurethane Waterproofing](#), [Bituminous Waterproofing](#) and more.
